Organization: FICTIONAL DEMO

Fictional case review

FICTIONAL DEMO: Harrison Studio disputes the start date and scope of an office refurbishment by Example Works. The unsigned services agreement records 15 June 2026; the client account reports activity on 12 June. The signed variation referenced in correspondence is absent. Findings are authored fixtures, not a live AI run.

- 50 file(s), 5 communication(s), 8 expert report(s), and 1 chronology event(s) were included in the report input.
- 50 file(s) include SHA-512 or secure hash references; 0 file(s) include previous-hash continuity references.

Chronology Analysis

- Jun 12, 2026, 8:00 PM | Response gap of 12 days | No logged activity between "Services Agreement" and "Client Start Date Account".

Hash Analysis

0 file(s) include MD5 references, 50 include SHA-512 or secure hashes, and 0 include previous-hash values.

0 file(s) include public verification identifiers or links for third-party review.

- Timestamp status: not_timestamped (50)

Verification Impact

- Verification status: sample hash only (50)

Origin Analysis

- Origin: Fictional sample team (50)

Recommended Review Actions

- Use the document-version and source-folder text files for full per-file details, including public verification links, hashes, timestamps, and origin metadata.
- Review any file with missing hash, timestamp, verification, or uploader metadata before treating it as a strong chronology anchor.

Cumulative File Review Appendix

This appendix preserves a cumulative view of the 50 file(s) in the claim package for adjuster review.

The file sample below is capped for PDF readability. The package text exports contain the complete per-file details for third-party review.
