Chronology

Client reports work began. | Date as stated: 12 June 2026

e5788d3e664b3f8e7f83c472 / 94f3d597e17621d8a4501932; Record summary: Work began on 12 June 2026.

Agreement states scheduled start. | Date as stated: 15 June 2026

e630d0329bf65f20af7f679a / 3ab928c4f1ecde422de88cb9; Record summary: Scheduled start: 15 June 2026.

Potential discrepancies

Scheduled and reported start dates differ. Context is unresolved; the difference alone does not establish a contradiction.

e630d0329bf65f20af7f679a / 3ab928c4f1ecde422de88cb9; Record summary: Scheduled start: 15 June 2026.

e5788d3e664b3f8e7f83c472 / 94f3d597e17621d8a4501932; Record summary: Work began on 12 June 2026.

Methodology and limitations

Authored demonstration findings; no AI was invoked. Verify findings against the fictional cited sources.

File verification establishes a match to the recorded version.

Recorded handling history begins at the documented app observation point; hashes do not establish authorship, truthful contents, or continuous custody.

App timestamps are app assertions. No external timestamp validation available.

Ordinary private storage with signed tamper detection; no WORM assurance.

Derived text does not preserve an original digital signature. Original bytes are preserved separately.

FICTIONAL SAMPLE. Findings are authored demonstrations, not live AI results.

Dates of intake are illustrative. Real hashes were calculated at sample generation, not at the fictional intake time.

Demonstration signing key only; no production issuer trust or externally validated timestamp.

50 fictional source files: 15 Word documents, 15 Excel workbooks, 15 PDFs and 5 AI-generated photos. Synthetic photos are not evidence of actual conditions and have no extracted text.
